Subject: FW: ESAT Year 3 funding for Upper Animas - Data Management

Steve – Please give me a call ASAP. I've been talking to several folks and I have found out several things – among them the issue of Data management. John Wieber provided the following explanation below for the 20K that I have agreed to give him. I have a message into Dan Wall about forward funding some of his field work next year. If its convenient, you can call me this evening on my cell phone.

Subject: ESAT Year 3 funding for Upper Animas - Data Management

Hi Paula,

As discussed, the \$20,000 of pipeline funds are to be put into the ESAT contract year 3 Data Management Task Order. The money would be used for long-term data management needs at the Upper Animas Mining District site related to remedial work and would include such tasks as loading analytic data into SCRIBE and making it available through various Region 8 software

tools.

The START contract does not typically get involved with remedial work and is usually restricted to removal, emergency response, and site assessment work. It is my understanding that START will not be involved in the longer-term data management activities of the Upper Animas site.

John Wieber
